WASTE INSTALLATION INSTRUCTIONS (STEPS 1 - 4)

1. Locate the rubber and plastic washer into the recess on the top face of the waste body (A).
Ensure that the rubber washer is in contact with the mounting surface.
2. The hole in the basin needs to be between $\text{Ø}43$ - $\text{Ø}48$. From below push the waste assembly up under the hole in the basin, and hold in place (B).
3. Slide the flange washer over the tail of the waste flange and locate the assembly into the waste hole (C).
4. Fix the waste assembly in place using the fixing screw provided (D).

WASTE INSTALLATION INSTRUCTIONS (STEPS 5 - 7)

5. There are two bounce cores supplied with the basin waste: bounce core 'A' is for 'click-clack' wastes and bounce core 'B' is for an always open waste. Install the required bounce core into the waste flange (E).
6. Screw the cap onto the bounce core (F).
7. Make the waste connection using the bottle trap or sewage pipe. Check for leaks before concealing pipework.
